

Eugen Ostafi

Date of birth: 13/10/2003 | **Nationality:** Moldovan | **Phone number:**

(+373) 67524390 (Mobile) | **Email address:** eo62115@gmail.com |

Address: Chisinau, Chisinau, Moldova (Home)

SKILLS

Front-End

Next.js | React | TypeScript | JavaScript | HTML | CSS | Tailwind CSS | SASS | React Router | Axios | Redux

Back-End / APIs

Next JS | Python | REST API | CRUD | JWT Authentication | WebSocket | API Integration | HTTP/HTTPS

Tools

GitHub | Figma | Postman | Docker

WORK EXPERIENCE

FULL-STACK DEVELOPER – CHALLENGE STORE – 24/06/2026 – Current – CHISINAU, MOLDOVA

Designed and developed a modern e-commerce platform from the ground up, creating both the **UI/UX design** and the **full-stack** implementation of the online shopping experience.

[Live Demo](#)

Key contributions:

- Designed the complete UI/UX experience, including layouts, visual components, and user flows.
- Developed a responsive e-commerce website with product catalog, product pages, checkout, reviews, and company information sections.
- Built advanced shopping features including product filtering, sorting, favorites, cart management, and order summary.
- Implemented multilingual support for **Romanian, English, and Russian**.
- Created modern animations, interactive components, and optimized interfaces to improve user experience.
- Integrated the platform with the company's ERP system for automatic product synchronization, stock updates, and order processing.
- Developed API endpoints for products, orders, images, and data synchronization.
- Prepared and optimized the application for production deployment and real-world customer usage.

WEB DEVELOPER – RTI SYSTEMS – 02/04/2026 – Current – CHISINAU, MOLDOVA

Develop and maintain multilingual web platforms — from UI implementation to production deployment.

Projects:

- [RSistems](#)
- [RParking](#)

Main responsibilities and achievements:

- **UI/UX Design** — Create and prototype interface designs in Figma.
- **Frontend Development** — Build SSR web applications with Next.js (TypeScript), Tailwind CSS, and internationalization (Romanian, Russian, and English).
- **SEO** — Implement structured metadata, JSON-LD schema, hreflang tags, and keyword optimization for local search.
- **Content Management** — Maintain multilingual content and translation files.
- **Deployment** — Deploy applications to cPanel and custom Linux servers, configure domains, SSL, and production environments.
- **Collaboration** — Work closely with system administrators on server infrastructure, DNS, and deployment pipelines.

During my 4-month at Digital Grow Solutions, I worked as a Web developer within a young and dynamic team, contributing to the development of modern websites and AI-powered chatbots. My role focused on building responsive user interfaces and collaborating closely with backend developers, designers, and project managers.

Main responsibilities and achievements:

- Developed user-friendly and responsive front-end components for web products
- Collaborated in a fast-paced team environment using modern frameworks and tools
- Integrated UI elements with backend services to create ready-to-launch products
- Adapted to tight deadlines, frequent client feedback, and rapid project changes
- Gained experience in delivering production-ready solutions used by real customers
- Improved communication, teamwork, and problem-solving skills

Projects:

- [Lumea Mea](#)
- [Krov Acoperis](#)

PROJECTS

01/06/2026 – CURRENT

Vocallis — AI Voice Receptionist Platform

Developed an AI-powered voice receptionist platform that helps businesses automate customer phone conversations in **Romanian** and **Russian**, allowing them to answer questions, take reservations, and manage orders without a human operator.

[Live Demo](#)

Technologies: React, TypeScript, Node.js (Fastify), OpenAI GPT-4o, Deepgram STT, ElevenLabs TTS

Key contributions:

- Built the front-end interface and integrated it with AI voice services for real-time conversations.
- Developed AI assistants for **Customer Support, Reservations, and Orders**.
- Added multilingual support for **Romanian** and **Russian**.
- Improved speech recognition accuracy for the Moldovan Romanian accent.
- Created a responsive and user-friendly interface with modern UI animations.
- Deployed and maintained the application in a production environment.

13/10/2024 – CURRENT

Personal Portfolio Website

Description:

Designed and developed a responsive personal portfolio to showcase my front-end development skills, projects, and professional background. The site serves as a central hub for my work, demonstrating expertise in HTML, CSS, JavaScript, and modern front-end frameworks.

Key Contributions:

- Fully responsive layout optimized for desktop, tablet, and mobile
- Interactive project gallery with detailed case studies
- Smooth navigation and clean, minimalist UI/UX
- Performance-optimized and accessible design

Technologies used: React, TypeScript , Sass and GitHub.

03/09/2024 – 03/10/2024

Practice at Orange Systems

Project: **ParkingGuru**

Description:

A web platform for real-time urban parking management with secure authentication and role-based access.

Key Contributions

- Built the front-end interface using React.js and Bootstrap
- Implemented real-time parking reservation and tracking components

- Integrated GraphQL API for efficient data handling
- Developed UI flows for drivers, administrators, and law enforcement
- Helped implement secure access using OAuth2 and JWT
- **Tech Stack:** React.js, GraphQL, Node.js, PostgreSQL, JWT, Git, Docker

Outcome:

ParkingGuru optimizes urban parking efficiency by reducing congestion, improving resource utilization, and enhancing the user experience for drivers and administrators. It contributes to smart city initiatives, supporting sustainable urban development.

03/09/2023 – 27/10/2023

Practice at Orange Systems

Project: **KitchenGuru**

Description:

An AI-powered cooking assistant that generates recipes, reduces food waste, and improves home cooking experience.

Key Contributions

- Developed main front-end modules using React.js
- Integrated AI-based recipe generation using OpenAI API
- Built ingredient-based recipe search and filtering features
- Designed a simple community interface for user feedback and ratings
- Helped implement sustainable cooking features to reduce food waste
- **Tech Stack:** React.js, Node.js, Express, MongoDB, OpenAI API, OAuth2, JWT, Git, Docker

Outcome:

KitchenGuru enhances the home cooking experience by simplifying meal planning, reducing food waste, and fostering a vibrant culinary community. It provides an intelligent, user-centric platform that empowers users to cook creatively, sustainably, and efficiently, contributing to modern solutions for food sustainability and culinary innovation.

● HOBBIES AND INTERESTS

Hobbies

I am passionate about mathematics, science, and software engineering, and I enjoy exploring how emerging technologies—particularly artificial intelligence—can be integrated into practical, real-world projects. I like building innovative applications that combine modern web technologies with AI to solve complex problems and improve user experiences.

Outside of programming, I enjoy playing chess, which strengthens my strategic thinking and problem-solving skills. I also enjoy solving Rubik's Cubes as a mental challenge that improves logic and pattern recognition. In my free time, I stay active through football and enjoy following professional football, appreciating teamwork, tactics, and continuous improvement.
